(LES) ANTIFA SYMBOLS, TACTICS & WEAPONS

(LES) ANTIFA aka Anti-Fascist Action, Black Bloc, AFA, 161, 161 Crew is a radical far-left, revolutionary Marxist anarchist movement that is responsible for “a level of sustained political street warfare not seen in the U.S. since the 1960s.” Antifa is comprised of autonomous local/regional groups and individuals who protest against fascism in all its forms which according to their ideology includes conservatives, Trump supporters and law enforcement. Antifa denounces the capitalist economic system and the U.S. government and encourages the use of violence and intimidation to undermine and overthrow both. They use highly sophisticated information operations and insurrection tactics toward their long-term goal of establishing a communist world order. They have a militant arm that trains in guerilla warfare and advocates theft of goods and armed insurrection. Antifa instructs activists to build a culture of non-cooperation with law enforcement who they view as racist enforcers of the fascist American government.

(LES) **Antifa Violence Against Law Enforcement Officers:** Hundreds of law enforcement officers have been injured by Antifa anarchists during violent riots that began after the May 25 death of George Floyd. Antifa and other anarchist extremists have assaulted officers with bricks, rocks, baseball bats, frozen water bottles, lasers, urine, Molotov cocktails, hammers, metal chains, broken bottles, commercial-grade fireworks and other weapons. Officers have been shot, stabbed, and run over by vehicles. Officers have been hospitalized with broken bones, shards of glass in their eyes, broken eye sockets, brain bruises, broken kneecaps, broken teeth and much more. Antifa anarchists have also targeted federal law enforcement officers with weapons as well as efforts to start fires at Federal Courthouses with officers inside the building. Antifa also engages in doxing, exposing officers home addresses, the identities of their family members, locations of their children schools and other private information with the intent of inciting harm against officers and their family members.

(LES) ANTIFA SYMBOLS, TACTICS & WEAPONS**(LES) Antifa Symbols, Emblems & Identifiers**

(LES) ANTIFA Symbol: The Antifa symbol consists of a black circle with red and black flags in the center. Distinguishing attributes include the words Antifa or Antifascist Action (in various languages) written on the black circle. Sometimes the name and/or location of a specific group is written. The positions of the black and red flags can differ. The origin of the symbol is the 1932 German communist paramilitary movement Antifaschistische Aktion logo. Antifa emblems appear on flags, tattoos, patches, graffiti, signs, stickers, protest shields, clothing, on social media and much more.

(LES) Three Arrows in a Circle: Three arrows or three arrows in a circle is a popular Antifa symbol and sometimes appears on their flag. The symbol of three arrows pointing southwest to the lower left inside a circle originated with the German 1930's antifascist group 'Iron Front'. It was designed to easily cover Nazi swastikas. Some experts say the arrows represented German political parties and organizations that were supportive of the anti-fascist movement. The Antifa International website states that the arrows stand for unity, activity, and discipline.

(LES) Antifa Symbols, Emblems & Identifiers

(LES) AFA, 161 & 161 Crew: AFA is the acronym for Anti-Fascist Action. 161 is the alphanumeric code for AFA. It is used by Anti Fascist Action as a code for AFA (A=1, F=6, by order of the alphabet). 161 Crew often refers to Antifa hooligan (football clubs) but has also appeared in graffiti indicating Antifa activists.

(LES) Good Night White Pride aka GNWP: A popular Antifa slogan and symbol is Good Night White Pride aka GNWP. It appears on flags, tattoos, patches, graffiti, clothing and more. The symbol originated from an actual incident in Ann Arbor, MI in 1998 when the KKK held a rally and clashed with anti-racist counter-protesters. A photo of an Ann Arbor anti-racist kicking a KKK member in the head at the rally became the iconic silhouette image of the symbol. White pride signifies white nationalist ideology. There have been many variations of the symbol and slogan including; Good Night Alt-Right and Good Night Right Side. Anti-Antifa groups have a similar symbol that reads 'Good Night Red Side'.

(LES) Anarchist Flags & Symbols

(LES) Anarchist Flags: A diagonally bisected red and black flag is the most popular anarchist flag. It is a symbol of anarcho-communist movements. The black represents anarchism and the red represents socialism. The Black flag is a traditional anarchist symbol that represents the absence of a flag and signifies opposition to the idea of nation states. Variations include the Circle 'A' symbol on red, black or red/black flags. 'We Will Tread' is a new anarchist flag that is a response to the historical yellow American Gadsden flag that reads 'Don't Tread on Me' and depicts a rattlesnake coiled and ready to strike. The new red anarchist flag depicts a black fist clutching the snake and reads 'We Will Tread'.

(LES) Anarchist Symbol aka Circle-A Symbol: The 'Circle A' symbol is the most recognizable symbol for anarchy. It is comprised of the capital letter 'A' surrounded by the capital letter 'O'. The letter 'A' signifies the first letter of 'anarchy' or 'anarchism' and the 'O' stands for order. Together they stand for "Anarchy is the mother of Order," the first part of a famous anarchist quotation. The '@' sign or '(A)' can be used to represent the Circle-A.

(LES) A.C.A.B. is an anti-police acronym standing for 'All Cops Are Bastards'. ACAB is used by skinheads, anarchists and hooligans (violent soccer fans) and is found in graffiti, tattoos, protest signs and other imagery. ACAB is sometimes depicted in alpha numeric code 1.3.1.2. December 13 is 'A.C.A.B day' (13.12).

**(LES) ANTIFA SYMBOLS, TACTICS & WEAPONS****(LES) Antifa Protest Tactics**

(LES) Black Bloc Tactic aka 'Be Water': Black Bloc is a popular anarchist protest tactic where individuals wear black clothing, scarves, sunglasses, ski masks, gas masks, motorcycle helmets with padding or other face-concealing and face-protecting items to conceal their identities, make it difficult to distinguish between participants and protect their faces and eyes from pepper-spray. It allows protesters who commit assaults or vandalism to blend back into the crowd to avoid recognition. 'Be Water' or 'Be Like Water' has become code for the Black Bloc tactic and often appears in protest posters, signs, graffiti and on social media. The expression refers to moving like a body of water and being part of an indistinguishable mass of water. One protest poster reads "Wear Black, Drink Water, Be Water".

(LES) Female Shields: For several years Antifa has used female members as human shields against counter-protesters and officers. They count on men being restrained when facing a woman so Antifa men will strike and use women to block the victim or bystanders from chasing the offender as he retreats back into the mass of protesters. Female Antifa anarchists will use every means of blocking including grabbing, hitting and committing assaults to block a pursuer. If the woman is hit or injured during this action Antifa will advance the narrative that they were assaulted for no reason.

(LES) Mom Bloc aka Wall of Moms (WOM): In Portland on July 19 a network of women called Wall of Moms created a human barricade between protesters and federal officers. The women wear yellow shirts and bicycle helmets, link arms and chant slogans. WOM aka Mom Bloc now has chapters in 22 cities across the U.S. Members of Mom Bloc have been charged with assaulting officers. A journalist in the field recognized a lot of 'moms' as the same Antifa women who dressed in black days before. He reported that most of the women are not mothers and many do not identify as female. WOM is an anti-police information operation intended to demonize officers and depict all women as peaceful moms just trying to protect kids.

(LES) ANTIFA SYMBOLS, TACTICS & WEAPONS

(LES) Antifa Weapons

When Antifa anarchist extremists participate in demonstrations they come prepared to fight counter-protesters and assault law enforcement officers. They carry items such as brass knuckles, poles, sticks, bricks, bottles, road flares, crowbars, sling shots, retractable clubs, hammers, chains, knives, frozen water bottles, pepper spray, fireworks, bottles of urine, metal chains, improvised explosive devices and more. They deploy noxious gases, use lasers, push through police barricades and attempt to exploit any perceived weakness in law enforcement presence. Antifa and other anarchist extremists use commercial grade fireworks to assault officers. They use smoke bombs and other fireworks to cause panic, disrupt rallies and camouflage their attacks. There have been recent incidents where rioters in Portland barricaded Police Precinct and Federal Courthouse buildings and attempted to burn the buildings down with officers trapped inside. The following items have been seized by various Police Departments during Antifa protests / riots.

**(LES) ANTIFA SYMBOLS, TACTICS & WEAPONS****(LES) Antifa Protest Tactics & Weapons**

(LES) Laser Pointers: Antifa and other anarchists use lasers at protests for various purposes. They aim them at officers to distract or temporarily flash blind them as a method to disrupt the officers view of the people in front of them or as a diversion to draw officers attention from another area of the protest. They also aim lasers at camera sensors to temporarily flash blind, or permanently disable cameras or to try and shut down facial recognition systems. Lasers are also used as a weapon aimed at officers to try to inflict eye or skin injuries. In Portland demonstrators trying to break into the Mark O. Hatfield Federal Courthouse targeted federal officials with high-intensity lasers. Three federal officers deployed to Portland currently have eye injuries and may have been permanently blinded from rioters pointing lasers directly into their eyes.

(LES) Umbrellas as Shields & Weapons: Demonstrators in Portland, Seattle and other cities are using umbrellas as shields against tear gas and pepper spray to thwart police in crowd dispersal. This tactic originated in the Hong Kong Umbrella Movement of 2014. Umbrellas also function to conceal criminal acts and to protect the identities of anarchists from facial recognition. Rioters change clothes behind the umbrellas to avoid arrest. In Portland on June 7th Police found an umbrella that had been converted to a weapon by attaching a blade to the end of it.

(LES) Leaf Blowers: Cordless leaf blowers are being used to blow tear gas back toward federal officers. The tactic is being called 'Dad Bloc' and 'Leaf-Blower Dads'. It is being portrayed as dads using leaf blowers to back up the 'Wall of Moms'. Most of the men are Antifa members and many are not dads. The media narratives of 'Dad Bloc' and 'Wall of Moms' is an information operation that depicts violent protesters as peaceful family members and demonizes officers.

(LES) ANTIFA SYMBOLS, TACTICS & WEAPONS

On July 25 Seattle police seized dozens of improvised explosives and other weapons that were intended to arm protesters.

On July 27 Portland Police found a bag containing Molotov cocktails and loaded rifle magazines at a park in Portland, close to where nightly protests take place.

(LES) Antifa Improvised Explosive Devices

(LES) Molotov Cocktail: aka petrol bomb, gasoline bomb, bottle bomb, poor man's grenade, fire bomb and fire bottle is a generic name used for a variety of bottle-based improvised incendiary weapons. There have been several incidents in June and July where Molotov cocktails have been used to target officers, police vehicles and buildings. On May 29 during riots in Brooklyn a 27 year old woman hurled a Molotov cocktail at an NYPD vehicle with emergency lights on and occupied by four police officers, causing damage to the vehicle and putting the officers' lives in serious danger. In a separate incident in Brooklyn two rioters, who are licensed attorneys, hurled a Molotov cocktail at an NYPD vehicle and were inciting others to do the same. On May 29 two men threw Molotov cocktails into a Dakota County, Minnesota government building. On July 25 in Seattle a group of rioters used Molotov cocktails to destroy several trailers at a construction site and to firebomb the King County Youth Service Center. Then the group of anarchists walked to the East Precinct accompanied by a van that distributed "baseball bats, pyrotechnic explosives, APR respirators, improvised shields, and face masks" to members of the crowd. "Moments later an explosion blew an 8-inch hole into the wall of the East Precinct." The Seattle police discovered dozens of improvised explosives, smoke bombs bundled together, bear mace, improvised spike strips, nails and other weapons in the van that was stationed at the protests. During the same protest rioters shot mortar fireworks and tossed explosives at officers.

(LES) M1000 Type of Explosive aka Quarter Stick: In Portland on June 6, an explosive device was thrown over the fence at the Multnomah County Sheriff's Office (MCSO) targeting deputies during a protest. Two deputies reported concussion injuries due to the explosion. Portland Fire & Rescue Fire (PF&R) investigators believe this was an improvised explosive device similar to a M1000 firework. This M1000 type of explosive is extremely dangerous, and is nicknamed a quarter stick, in reference to its similarity to a stick of dynamite. These are often poorly made by non-professionals, and they are very unstable. This device produces a strong concussive force. Witnesses said the explosion was at least twice as loud as the largest mortar style fireworks they had been hearing earlier in the week.

Items Portland police seized from a protester who is accused of hitting a Portland Fire and Rescue medic with a ball bearing from a sling shot.

(LES) Antifa Tactics & Weapons

(LES) Sling Shots: Antifa protesters use sling shots aka 'wrist rockets' to launch metal balls, large rocks, bottles and other projectiles at officers. On July 13 a Portland Fire and Rescue medic was struck by a ball bearing from a slingshot while in the area of demonstrations in downtown Portland. Police said the ball bearing came from a demonstrator who had a "wrist rocket". The metal ball hit the medic in the side of his chest. A number of other items were seized from the man, including a switchblade, crowbar, two slingshots and slingshot ammunition, flares, spray paint, and "items believed to be pyrotechnics." On July 18 a CBP Officer was injured when he was struck with a projectile from a suspected "wrist rocket" causing a laceration requiring sutures to his leg.

(LES) U Shaped Bicycle Locks: Antifa uses U shaped bicycle locks as an offensive weapon of choice because it can be used as a blunt force object and is legal and easy to carry a bike lock. These were used extensively during the violent 2017 Berkeley, CA protests in which multiple people were wounded. Antifa bicycle activists who are armed with this weapon use the excuse of having a bicycle if they are stopped by law enforcement to explain why they have it.

(LES) Bicycle Scouts: During the George Floyd protest riots in New York City Antifa utilized a complex network of bicycle scouts to move ahead of demonstrators in different directions of where police were and where police were not for purposes of being able to direct groups from the larger group to places where they could commit acts of vandalism.
